

8-3C-4: AMOUNT OR QUANTITY REQUIRED

- A. The amount (number of acre-feet) of water required to be conveyed to the City shall be the amount considered sufficient to meet the water use requirements of the proposed use, to be determined in accordance with the following table:

Use	Based on Equivalent Residential Connections (ERC)	Acre-Feet Required per ERC
Residential Uses	1.00 per dwelling unit	The average annual ERC use as established in the current Division of Drinking Water for Fillmore City ¹
Non-residential Uses (including, but not limited to Industrial and Commercial Uses)	An amount sufficient to meet the projected needs of the proposed development based on an evaluation of demand characteristics for similar uses as determined by the City's engineering department	

Subject to change to follow the average annual ERC use as established in the current Division of Drinking Water for Fillmore City.

- B. Unless otherwise mitigated, the priority date of any contributed water right(s) relied upon to meet these ordinances must have sufficient seniority to be deemed a reliable source of water in perpetuity without risk of a priority call.
- A. Subsequent to a determination of water requirement, if the use of an existing development is modified and results in an increased use of water, additional water right(s) sufficient to meet the projected needs of the modified use shall be required to be conveyed to the City before a building permit is issued. If a building permit is not required for the expanded use of water, the owner of the land shall provide additional water right(s) to the City to meet the expanded use within thirty (30) days of the expanded use.
- B. Any person or entity desiring to extend the water system of the City to a project or development, including extensions for annexations, shall submit a description of the project, engineered drawings and projections for the development and culinary water use. For an annexation petition, this information will provide a basis for an annexation agreement between the developer and the City.

8-3C-5: FEE:

¹ Currently 0.90 per ERC for combined indoor/outdoor use for a Single Family Home, but subject to change in accordance with the average annual ERC use as established in the current Division of Drinking Water for Fillmore City.

For all developments within City limits, a developer shall pay a fee of \$3,000 per equivalent residential connection (“ERC”) in lieu of conveying water for all developments. If the demand for a development exceeds one hundred fifty (150) ERCs, the developer is not eligible to pay a fee and must convey water right(s) as provided herein.
